Compliance Ready Zero Limits Data Transfer

Quick Specifications

Data Volume:

Transfer Speed: File Types:

Deployment:

Unlimited High-speed bulk transfer All formats Azure/On-premise

Product Overview

Transfer is a modern data import/export solution built for legal teams and IT service providers managing sensitive documents in NetDocuments. Designed for ease, flexibility, and security, Transfer enables bulk imports and exports—no scripts, no workarounds, and no NetDocuments Toolkit required.

Key Features

- Bulk Import & Export: Move large sets of data in and out of NetDocuments with just a few clicks.
- SV Enabled: Effortlessly manage large-scale imports and exports using CSV mapping for precise control.
- Full Folder Structure Support: Preserve workspace organization, no more broken hierarchies.
- ✓ No 500-Item Limit: Bypass NetDocuments' legacy export restrictions for seamless, full-scale migrations.
- Intuitive Interface: Wizard-based workflow; anyone can use it, no technical training needed.
- Secure & Audited: Every action is logged for compliance; all transfers encrypted.
- For Law Firms, MSPs & In-house IT: Built to support onboarding, offboarding, lateral moves, and ongoing data management.

Why Choose Transfer?

- Accelerate matter mobility whether for a single attorney or a full team.
- Simplify complex migrations and backups.
- Empower IT and legal ops with modern tools designed for the realities of legal work.

Popular Use Cases

- Onboarding/offboarding attorneys and staff
- Lateral lawyer data migrations
- Merging or splitting firms
- Large-scale document archival
- CSV-driven mass updates

Partner Value

Position your firm as a strategic advisor. Own the data movement, secure the client relationship, and open new revenue streams by delivering compliant, efficient document management.

Strategic Advisor Position yourself as the go-to data expert
